Enhancing Lives:  
Chronic Care  
Management, Your  
Path to Wellness.**

IMPROVING PEOPLE'S LIVES

## What is CCM?

---

Chronic Care Management (CCM) is a comprehensive healthcare service designed to provide consistent support and coordination for individuals living with chronic health conditions. This program ensures that patients with ongoing medical needs receive the personalized attention and care they require to lead healthier, more fulfilling lives. Through regular communication with healthcare professionals, medication management, symptom tracking, and lifestyle guidance, CCM strives to improve the quality of life, reduce hospitalizations, and enhance the overall well-being of those managing chronic illnesses. With CCM, you can take control of your health journey,.

## How Does it Work?

---

**More than two thirds of patients on Medicare qualify for Chronic Care Management.**

We work to customize a care plan with your Medical Practice to ensure a seamless process. **Our goal is to improve the way you experience healthcare.** It starts from the beginning, with our dedicated staff connecting with patients who have been identified for services.

Our clinical staff checks in with your patients regularly to monitor their health and implement their prescribed care plan. Our care staff will act as an extension of your practice and integrate into workflows to ensure continuity.

Each month our company will bill Medicare for the services completed and compensate your practice according the terms in the practice agreement

**Improved Patient  
Engagement & Outcomes**
